

VG MAB

VG1-0506-011M-MAB

The VG-MAB booster set features one stainless steel multistage pump mounted on a powder-coated steel base plate. The pump is controlled by our advanced MAB variable speed control panel.

PRODUCT FEATURES

- Variable speed pump control
- 304 stainless steel pump
- 24-litre pressure vessel(s) with flow through isolation and drain valve
- Air-cooled inverters
- BMS volt-free contacts
- External enable on/off
- Hand/off/auto switches
- External low water
- Dry run protection
- Glycerine filled pressure gauge
- Pump check valve

APPLICATIONS

Cold water pressure and flow boosting in a range of domestic, commercial and industrial applications.

PRODUCT DATA SHEET

Specification

Suction connection	1 1/4"
Discharge connection	1"
Maximum working pressure	10.00 bar
	1.10 kW
Weight_incl_Fittings	40.00 kg
Vessel_Size	24.0 L
Number of pumps	1

Performance

Electrical Data

Mains connection	1~ 230V/50Hz
Current per pump	4,8 A

Model Codes

VG1-0506-011M-MAB

Range

No of Pumps

Nominal flow in m³/h

Motor kW per Pump
